

IMA RADIAL

INDIRECT OIL FIRED HEATER
Clean Dry Heat 210,000 - 630,000 Btu

91%
Efficient

All the heat you need!

THERMOBILE®

High Capacity - Mobile - Compact - Efficient

High efficiency heat exchanger (91%).

Durable phosphated body panels with powder coating.

Combustion chamber heat resistant up to 1,500°F.

100% Clean dry heat.
Outlet temperature 125-175°F.
Large heat throw.

Radial fan for powerful heat distribution.

Thermostatically controlled with overheat protection and safety shut off.

Preheating of chamber, so that no cold air is blown during start up.

Burner rain cover.

Protection bars all around.

Automatic burner with thermostat connection.

Lower tray for oil containment during servicing.

Tigerloop standard.

APPLICATIONS:

CONSTRUCTION INDUSTRY

- Heating and drying of construction sites and all-weather projects.
- Concrete curing.

EVENT HEATING

- IMA models are especially suited for heating tents, showrooms and sporting events.

AGRICULTURE

- Heating of sheds and storage areas.
- Drying of agricultural products.
- Storing bulbs without the risk of harmful ethylene emission.

AUTO INDUSTRY

- Heating of workshops and body preparation areas.
- Spray booth heating.

HORTICULTURE

- Heating of greenhouses and polytunnels without the risk of harmful CO2 emission.

INDUSTRY

- Heating of warehouses and workshops.
